## **CSPI Announces New FPGA Development Platform**

*Ideal for Rapid Design of Embedded DSP Applications*

**San Diego, CA, June 1, 2009** - CSP Inc. (NASDAQ: CSPI) MultiComputer Division, a leading supplier of rugged embedded clusters, today announced its new FastCluster FPGA Development Platform at the Military & Aerospace Electronics Forum. The development platform includes a Virtex-5 FPGA XMC development board, a Board Support Package, and the CoreFire™ Design Suite on a Window based PC providing all the components needed to develop and debug computational intensive DSP applications.

"The FastCluster FPGA Development Platform integrates Annapolis Micro System's development tools and DSP libraries with FastCluster FPGA XMC modules. The GUI and dataflow model offer the hardware abstraction required to accelerate the programming of the 1000's of Xilinx DSP48E slices available on the FastCluster platform," said Bernard Pelon, Director of Product Research.

The introduction of this robust development platform delivers an efficient solution for engineers to start prototyping their FPGA applications targeted for deployment on the FastCluster XL-Gate architecture. Leveraging the Virtex-5 FPGA technology the XL-Gate is a reconfigurable payload ideally suited for radar, sonar, and surveillance signal processing.

### **About CSP Inc.**

Based in Billerica, Massachusetts, CSP Inc. (NASDAQ: CSPI) and its subsidiaries develop and market IT integration solutions for complex IT environments and high-performance cluster computer systems for commercial, scientific, and defense customers worldwide.

The MultiComputer Division helps its customers solve high-performance computing problems in the defense market by supplying very dense cluster computer systems with powerful real-time I/O capabilities that require minimal physical space or power. These systems are used in a broad array of applications, including radar, sonar, and surveillance signal processing.

### **'Safe Harbor Provision' Statement'**

CSP Inc. wishes to take advantage of the 'safe harbor' provisions of the Private Securities Litigation Reform Act of 1995 with respect to statements that may be deemed to be forward-looking statements under the Act. Such forward-looking statements may include, but are not limited to, statements regarding the success of the Company and its subsidiary's products and services. The Company cautions that numerous factors could cause actual results to differ materially from any forward-looking statements made by the Company. Please refer to the section on forward-looking statements included in the Company's Form 10-K filed with the Securities and Exchange Commission.
