Is it possible to set up two ports of a 10G Myricom NIC (10G-PCIE2-8C2-2S) with 2 different type of SFP+: 1xLR (Monomode) and 1xSR (Multimode)?

Model:

ARC Series C Network Adapters (10G-PCIE2-8CS-2S)

Software:

Sniffer

Operating System:

Supports both the Linux and Windows Operating System.

Information:

It is possible to set up two ports of a 10G Myricom NIC (10G-PCIE2-8C2-2S) with 2 different type of SFP+: 1xLR and 1xsr, just so long as there is a matching cable and sfp at opposite ends, it should work.
