Are the Broker ports auto-sensing and auto-negotiating for speeds?

Model:

nVoy Packet Broker

Software Release:

Broker Software Release, Version 1.0

Operating System:

The nVoy Broker application runs on a Linux variant. Users do not have access into the operating system

Information:

The Broker has a total number of 54 configurable ports. All ports can auto-sense the traffic speed.

In release 1.0, Ports 1 through 48 can auto-sense the traffic speed but need to be configured with a speed of 1 Gig, 10 Gig or 25 Gig.

In release 1.0, Ports 49 through 54 can auto-sense the traffic speed but need to be configured with a speed of 40 Gig or 100 Gig.

For additional details on the Broker please refer to the Packet Broker User Guide or contact CSPi support at support@cspi.com
